

### **AMENDMENTS TO THE ABSTRACT**

Please delete the section entitled "ABSTRACT OF THE DISCLOSURE" in its entirety and substitute the following section therefor:

#### **ABSTRACT OF THE DISCLOSURE**

An apparatus for performing cryptographic operations. The apparatus includes an x86-compatible microprocessor that has fetch logic, algorithm logic, and execution logic. The fetch logic is ~~disposed within a microprocessor and is configured to receive a cryptographic instruction as one of the instructions in an application program executing on the x86-compatible microprocessor.~~ The cryptographic instruction prescribes one of the cryptographic operations and one of a plurality of cryptographic algorithms. The algorithm logic is ~~disposed within the microprocessor and is operatively coupled to the cryptographic instruction.~~ The algorithm logic directs the x86-compatible microprocessor to execute the one of the cryptographic operations according to the one of a plurality of cryptographic algorithms. The execution logic is ~~disposed within the microprocessor and operatively coupled to the algorithm logic.~~ The execution logic executes the one of the cryptographic operations. The execution logic includes a cryptography unit for executing a plurality of cryptographic rounds required to complete the one of the cryptographic operations
